REMARKS

In the Advisory Action dated March 24, 2000, the Examiner indicated that she was not satisfied that "consisting essentially of" would exclude the amino crosslinking agent.

Now, in a determined effort to advance the prosecution of this case, Applicants have strictly limited their crosslinking agents to a specific Markush group. None of these crosslinking agents include any nitrogen atoms.

The amino crosslinking agent is accordingly now excluded, and the claims are believed to be in condition for allowance.

Favorable action is respectfully solicited.
